

Free Survival Items

FREE
Survival
Items

Over the past couple of years, several companies have started giving away free survival items. You might be a little skeptical, and I don't blame you. There is a catch: You have to pay the cost of shipping. But other than that, these products are completely free.

Companies do this in hopes that you'll purchase other products or sign up for one of their survival courses, but you don't have to if you don't want to. So if you're trying to acquire survival items but you don't have a lot of money, you should check out these products.

I've searched all over the Internet and compiled a list of all the free survival gear I could find. They come from companies such as Spyscape and My Tactical Promos, but there are many others. You can see my complete list of free survival items below.

I organized the products by category in case there's a certain type of item you're looking for. If you learn about any free survival products that aren't on this page, please let me know!

Full disclosure: I do get a commission if you order one of the items below, but the cost is the same to you either way. Now on to the list...
